```

This is absolutely one of my favorite recipes that
I've tried so far. The ingredient proportions are right on the mark, and the procedure is so
easy.

        </div>
    </section>

    <section id="share">
        <h2> Share </h2>
        <!-- There is an error here, check the image file extension!
-->

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

1. **Warning** Consider adding a `lang` attribute to the `html` start tag to declare the language of this document.

[From line 2, column 60; to line 3, column 6](#)

OLUTION--><html><head

For further guidance, consult [Declaring the overall language of a page](#) and [Choosing language tags](#).

If the HTML checker has misidentified the language of this document, please [file an issue report](#) or [send e-mail to report the problem](#).

2. **Error** Element `head` is missing a required instance of child element `title`.

[From line 3, column 7; to line 4, column 9](#)

```
--><html><heading> <!--
```

Content model for element `head`:

If the document is [an iframe srcdoc document](#) or if title information is available from a higher-level protocol: Zero or more elements of [metadata content](#), of which no more than one is a `title` element and no more than one is a `base` element.

Otherwise: One or more elements of [metadata content](#), of which exactly one is a `title` element and no more than one is a `base` element.

3. **Error** Element `heading` not allowed as child of element `body` in this context.

(Suppressing further errors from this subtree.)

[From line 3, column 7; to line 4, column 9](#)

```
--><html><heading><!--
```

Content model for element `body`:

[Flow content.](#)

4. **Error** Internal encoding declaration named an unsupported character encoding `utf-10`.

[From line 7, column 2; to line 7, column 24](#)

```
le.css"><meta charset="utf-10"><!--
```

5. **Error** The only allowed value for the `charset` attribute for the `meta` element is `utf-8`.

[From line 7, column 2; to line 7, column 24](#)

```
le.css"><meta charset="utf-10"><!--
```

6. **Error** Start tag `body` seen but an element of the same type was already open.

[From line 9, column 1; to line 9, column 6](#)

```
/heading><body><di
```

7. **Error** An `img` element must have an `alt` attribute, except under certain conditions. For details, consult [guidance on providing text alternatives for images](#).
